Quay Skills is an exciting new training initiative that brings cost-effective and highly realistic simulation technology to the ports and logistics sectors.

This suite of innovative yet easy-to-use simulators complements existing training methods while employing sophisticated software to dramatically enhance the learner experience in a safe, virtual reality environment.

Key Features...

- Enhanced learner confidence
- Prepares learners for hazardous conditions in a safe environment
- A total immersion experience
- More effective control for trainers
- Ability to train several people at once
- Significant reduction in machine maintenance and running costs of real kit
- Reduction in training-related accidents and insurance claims
- Assesses driver aptitude at induction, saving time and money
- Ideal re-assessment tool
- Reduced carbon footprint as a result of fuel savings
- Fully auditable training records
- Modular design to maximise use of simulator stations and keep capital costs down
- Ability to purchase additional simulator applications as budgets allow
- Fully integrated sales and support package
- Flexible purchase options

For demonstrations, training packages and purchase options call: +44 (0)151 647 4747 or visit: www.quayskills.co.uk

Physical simulator stations replicate the operator cabs of five separate pieces of dockside equipment:

• Gantry Crane

• Quay Crane (Luffing Jib)

• Straddle Carrier

• Forklift Truck (Counterbalance)

• IMV Tugmaster

Interchangeable control panels allow for maximum flexibility and keep capital costs low

TRAINING SIMULATORS

Quay Skills: Safety is a new and exciting approach to managing health and safety training and assessment for your staff.

Key Features...

- Online learning - undertaken whenever and wherever work patterns allow
- A modular approach - allowing learners to complete modules at their own pace
- Intuitive and user-friendly
- High levels of interaction retain learner involvement
- Scenario-based training and assessment exercises that recreate real life situations
- Media-rich animated scenarios
- Fully auditable assessment log for individual employees
- Unique ability to measure learner confidence levels when completing assessments
- Low cost entry - buy only what you need, when you need it
- High volume discounts for large purchases
- Ability to adapt/bespoke package

Getting started is easy.
Visit www.quayskills.co.uk
for further information and demonstration clips and your chance to sign up for a free, no obligation trial.

Quay Skills is the brand name for a newly launched suite of simulator based products developed by Mersey Maritime in partnership with AIMS Solutions (Liverpool), Drake Ports Distribution Services and ITS Training Limited. These include a set of physical simulators for Dockside Operations, a web-based package for Health & Safety training and a classroom based simulator for office based International Trade and Services operations.
